

## EQUIPMENT INTEGRATOR

Cegelec CEM provides integration of sensitive equipment qualified for use in new or existing nuclear facilities.

From **engineering** to **commissioning on site**, Cegelec CEM provides **integration of sensitive equipment that contributes, through its qualification, to essential safety and radiological protection functions.**

With operators qualified in mechanics, pipework and boilermaking, electrical installation and automatic control systems, we can perform all equipment integration operations on site.

### Cegelec CEM maintains the current nuclear fleet

As part of its **maintenance** activities on EDF's fleet in operation, Cegelec CEM offers a range of services in response to customer needs:

- ✓ **Safety reviews**
- ✓ **Ongoing equipment qualification**
- ✓ **Work to ensure regulatory compliance**
- ✓ **Incorporation of post-Fukushima operating experience feedback**
- ✓ **Management of equipment obsolescence and reliability enhancement**

In particular, Cegelec CEM carries out:

- ✓ **Renovation of fire protection and detection systems**
- ✓ **Renovation and modernisation of nuclear measurement systems**
