

OUR COMMITMENTS

Our commitments regarding Quality – Health – Safety – Radiological Protection – Environment

Our policy is based on four key commitments:

In line with the principles of the VINCI manifestos and the reference frameworks of our quality and radiological protection management systems, Cegelec CEM takes a **proactive approach to attain excellence in its projects.**

Safety and radiological protection – our priority:

Protecting the health and safety of the people behind our business is **our main concern.** We aim to achieve **zero accidents** by:

- ✓ Identifying risks
- ✓ Developing a safety culture
- ✓ Preventing and reporting hazardous situations

Quality – a value:

The quality of work is clearly oriented towards **customer satisfaction**.

Our management system guarantees the use of resources and methods to ensure that our services and operations **comply** with the **requirements** of our customers.

Cegelec CEM holds **ISO 9001** (quality), **OHSAS 18001** (safety) and **ISO 14001** (environment) AFAQ certification, as well as **QUALIANOR** radiological protection certification, and has done for many years.

Safety – a requirement for everyone:

Safety is an **absolute priority**, shared by everyone through the professional and rigorous approach taken by each employee. As part of the **Safety Excellence initiative** of the VINCI Energies Group, our safety culture is expressed by:

A rigorous and cautious approach

A questioning attitude

Effective and transparent communication

The environment – a principle:

Environmental protection forms a natural part of our sustainable development approach as a responsible industrial contractor.

Cegelec CEM take steps to **continuously improve** and **control its significant environmental impacts**, notably by:

- ✓ Reducing our electricity consumption
- ✓ Limiting our business travel and setting measurable and measured targets to reduce individual carbon budgets
- ✓ Reducing our consumption of natural resources
- ✓ Sorting and recycling the waste from our activities and introducing a circular economy
- ✓ Raising awareness and involving our personnel in these practices
- ✓ Training our employees in eco-design
- ✓ Engaging with our customers as part of a purchasing process and CSR offer
