

## PROCESS INTEGRATOR

---

**Thanks to its experience as an integrator, Cegelec CEM makes its customers' complex, large-scale projects a success.**

Cegelec CEM benefits from **extensive experience in managing major projects with high added value**, as the leader of a contractor group or a member of a consortium. We are able to offer relevant services through **tailored industrial plans**, making **outcome-based and performance-based commitments to our customers**. As a nuclear integrator, Cegelec CEM offers **turnkey services ranging from engineering, design, construction and commissioning, all the way up to the maintenance of customer processes**.

**These process integration services can be applied to:**

- ✓ **Turnkey design and construction projects** for the nuclear sector and large scientific facilities, involving new builds, alterations to existing facilities or specialised remote-controlled machines
- ✓ **Outcome-based projects** on the basis of performance, costs and deadlines
- ✓ **Projects with high added value in technical, regulatory and organisational terms**
